

Commercial Plant Permit – Collection Sheet

Applicant name: **Date:**

Name of plant

Provide the scientific and common name of the plant to be “taken” (whole or part):

Scientific Name:

Common Name:

Digital images

To confirm the identification, provide suitable images for each plant species to be taken.

Have you attached the required images of the targeted plants? YES NO

Total number of targeted plants found

Provide the total number of the targeted plants found at the collection site:

(A collection site is defined as the entire property where the applicant is authorized to take plants)

Total number of targeted plants to be taken

Provide the total number of plants to be taken in whole or in part (clippings, seeds, or fruit) at the collection site:

Sampling procedures

If collecting seeds or fruit, please consider the “Center for Plant Conservation Best Plant Conservation Practices to Support Species Survival in the Wild.” The recommendations offered by the Center for Plant Conservation (CPC) can be found by following this link: <https://saveplants.org/>. The CPC recommends collecting no more than 10% of an individual or population seed production in one season. Furthermore, if collecting clippings from species with multiple branches, collect one to five stem cuttings from each mother plant. If collecting clippings from woody or herbaceous perennials, TPWD recommends not collecting more than 25% of the branches.

Please check below the type(s) of take being planned:

Seeds Fruit Clippings Whole plant

Property map

Have you attached the required map of the property? YES NO

Landowner authorization letter

Have you attached the required landowner authorization letter? YES NO

Experience

Provide a description of your previous experience in maintaining and/or cultivating this species:

Facility locations

Provide address where plants will be grown or stored and in any other location where activities related to such plants would be connected.
