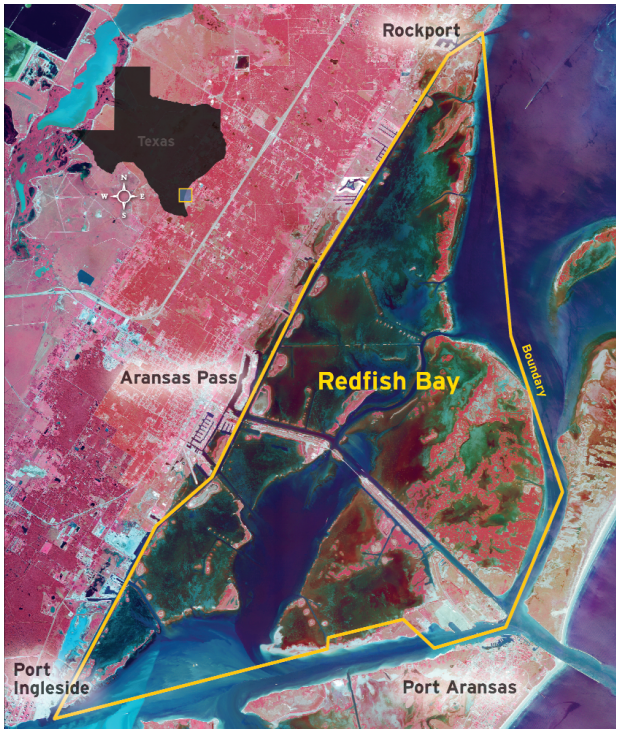
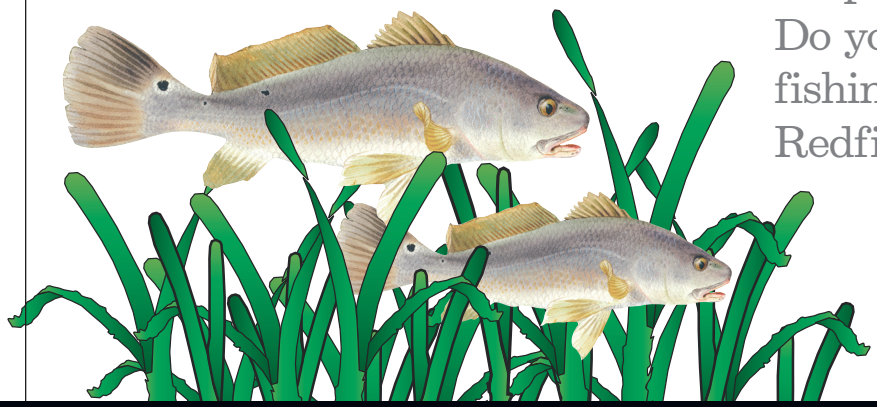
Good Seagrass = Great Fishing!

Rockport, Aransas Pass, Ingleside and Port Aransas are names synonymous with great fishing. One reason anglers are so successful here are the thousands of acres of seagrasses within the boundaries of Redfish Bay State Scientific Area.



Damaging seagrass with propellers destroys important bait and gamefish habitat. In Redfish Bay it is illegal to uproot seagrass with a submerged propeller.* Lift, drift, pole or troll when fishing in or crossing shallow areas and seagrass beds.

*Class C misdemeanor. Boat access is allowed throughout the scientific area. Trolling motors are exempt from the law.



Help protect seagrass.
Do your part to keep the fishing good in and around Redfish Bay.
