The tunnel lies
approximately 13 miles
east of the South Plains
parking lot and 4.5 miles
west of the Monk's
Crossing parking lot.

BATS

A colony of Mexican free-tailed bats inhabits the tunnel, with the largest bat populations occurring from April through October. The bats are very sensitive to traffic, noise, light and human presence.

While at the tunnel:

- Do not touch bats – alive or dead!
- Do not make loud noises.
- Do not shine lights or throw objects at bats.
- Do not linger inside tunnel.
- Raise as little dust as possible as you pass through.
- Wear long sleeved outerwear and hats while traveling through tunnel.
- Please walk your bicycle through the tunnel.

CAPROCK CANYONS TRAILWAY

Welcome to Caprock Canyons Trailway!

This 64-mile-long, multi-purpose trailway offers a unique and exciting recreational experience for hikers, bikers and equestrian trail riders. Day-use permits and updated trailway information can be obtained from Caprock Canyons State Park and Trailway headquarters: 3 miles north of Quitaque on FM 1065 (806) 455-1492.

Before Proceeding

- All visitors must obtain an entrance permit to use parking area and trailway.
- Overnights campers must obtain permits at Caprock Canyons State Park and Trailway Headquarters.
- Day-use fees may also be paid at one of the volunteer pay stations located at each trailhead.
- Do not tie animals to man-made structures.
- **Be Prepared**
 - Visitor services are limited and sections of the trailway are remote.
 - We do not recommend traveling the trailway alone.
 - Carry all water, equipment and supplies needed for your trip.
 - Drinking water stations and equestrian water tubs are available at many trailheads and developed primitive camping sites. Please note that availability of water is not dependable. During freezing weather and through the winter, water is usually not available!
 - Portable phones may be useful for reporting problems and emergencies, however, cell phone coverage is limited.
 - Beware of falling rocks. Rockslides are common in trailway cuts and near tunnel.
 - Rattlesnakes are common. Always watch where you put your hands and feet!
 - **Do not touch bats – alive or dead!**

QUITAQUE CANYON TRAIL

17.5 miles – access trailway at South Plains or Monk's Crossing.

Trail Information:

Western end: South Plains, MM 301.5
Eastern end: Monk's Crossing Trailhead, MM 284.5

Telephone: MM 284.5
Recommended backcountry sites:
Near rest rooms at John Farris Station (MM 295)
Clarity Tunnel eastbound (MM 289)

Estimated Completion Time:

Hikers: 12-15 hours

Bikers: 1.5-2 hours

Horseback Riders: 5 hours

KENT CREEK TRAIL

10 miles – access trail at Quitaque East or Turkey Depot.

Trail Information:

Western end: Quitaque Depot (TX Hwy 86), MM 279 or Quitaque East (No Parking)
Eastern end: Turkey Depot, MM 269
Comfort Station: MM 275
Recommended backcountry site:
Mulin's Rise (MM 275)

Estimated Completion Time:

Hikers: 5-7 hours

Bikers: 1-1.5 hours

Horseback Riders: 2.5 hours

THE CLARITY TUNNEL (MM 289)

PLEASE OBSERVE ALL WARNING SIGNS, ESPECIALLY THOSE REGARDING BATS IN CLARITY TUNNEL!

The tunnel lies approximately 13 miles east of the South Plains parking lot and 4.5 miles west of the Monk's Crossing parking lot. Round trip from Monk's Crossing is approximately 9 miles.

Day-hikers wishing to see the Clarity Tunnel should access the trailway at Monk's Crossing and hike west. There are no trailway access points between either South Plains or Monk's Crossing and the tunnel. A colony of Mexican free-tailed bats inhabits the tunnel, with the largest bat populations occurring from April through October. The size of this colony varies and is very sensitive to traffic, noise, light and human presence.

While at the tunnel:

- **Do not touch bats – alive or dead!**
- Do not make loud noises.
- Do not shine lights or throw objects at bats.
- Do not linger inside tunnel.
- Raise as little dust as possible as you pass through.
- Wear long-sleeved outerwear and hats while travelling through tunnel.
- Bats are known to transmit only two diseases to humans: **rabies** and **histoplasmosis**. Very few bats contract **rabies** and those that do rarely become aggressive. Bats that are easily captured are more likely sick and will bite in self-defense. Therefore, bats should never be picked up. **Histoplasmosis** is caused by a common ground fungus that lives in soil enriched by bird or bat droppings. A low percentage of individuals may become ill when inhaling large quantities of spore-laden dust.

OXBOW TRAIL

10 miles – access trail at Turkey Depot or Tampico Siding.

Trail Information:

Western end: Turkey Depot, MM 269
Eastern end: Tampico Siding (FM 657), MM 259
Comfort Station: MM 259
