ADDENDUM NO. ONE (01)

PROJECT NO: MR10347
POOL DRAIN LINE REPAIR

ABILENE STATE PARK

NOTICE TO ALL BIDDERS:

This addendum shall be considered part of the Contract Documents and is issued to change, amplify, or delete from or otherwise explain the documents where provisions of this addendum differ from those of the original contract documents. This addendum shall have precedence over the original contract documents and shall govern.

Bidders are hereby notified that they shall incorporate this addendum in their bid, and it shall be construed that the Contractor’s Bid shall reflect with full knowledge, all items, changes and modifications to the contract documents herein specified.

Bidders are advised to check for updates, addenda issuance, and bid opening date changes at the TPWD Infrastructure Division Website:

http://www.tpwd.state.tx.us/business/bidops/current_bid_opportunities/construction/

---

CLARIFICATION TO SCOPE OF WORK:

After camera inspection, it’s been revealed that the 6” WW drain line has a tee connection located at the connection where the pool line makes a turn and routes over to the pump house. The downstream side of the tee connection has a 6” valve and WW drain line that terminates at the creek, according to site representative. These new connections will also require an additional two-point repairs to be performed being the openings at four ends. Access will also need to be gained at the connection tee, removal of the tee, and provide pipe CIPP lining at that location. Once the CIPP lining is cured, a new mechanical joint (MJ) connection tee and appropriate connection fitting needs to be installed to reconnect the entire system as one. Additionally, after camera inspection, actual lengths for each run have been found to be approximately 115’ from pump room to the tee and approximately 85’ from tee to the pool.
