- a. **YES**
- b. **NO**

An aerial photograph showing a large, meandering river system, possibly the Mississippi River, flowing through a lush green landscape. The river is a light blue-green color, contrasting with the dense green forests and fields surrounding it. The river winds through the landscape, creating a complex pattern of bends and loops. In the lower left corner, a small bridge or structure is visible, crossing a narrow section of the river. The overall scene is a vast, natural landscape with a mix of water, forest, and open land.
