Trinity River National Wildlife Refuge Hunting Regulations

Welcome

Trinity River National Wildlife Refuge was established on January 4, 1994 with an initial purchase of 4,400 acres (18 km²). Since that time, the refuge has acquired additional acreage which now totals 30,000 acres (120 km²). The primary purpose of establishing this refuge is to protect a portion of the bottomland hardwood forest ecosystem along the Trinity River located in southeastern Texas. The refuge, which is a remnant of what was once a much larger natural area is a broad flat floodplain made up of numerous sloughs, oxbow lakes, artesian wells, and tributaries.
