The Caddo Lake Wildlife Management Area (WMA) is located in Marion and Harrison counties approximately 20 miles northeast of Marshall and 15 miles east of Jefferson. The WMA consists of 8,128 acres of a permanently flooded bald cypress swamp, seasonally flooded bottomland hardwoods and upland mixed pine hardwood forests. The climate within the WMA is relatively mild with hot and humid summers and mild winters. Mean annual precipitation is 67 inches, with periods of heaviest precipitation occurring in April and May. Water levels usually range from 165 - 172 feet. We suggest you check local water levels and projected weather forecasts for your hunt period prior to arrival and come prepared. All hunters are encouraged to bring a GPS unit or a compass. A primitive campsite is available at the end of County Road 3414 on the Caddo Lake WMA; offers no water, electricity or toilet facilities.
