

## ACKNOWLEDGMENTS

This document is the culmination of the vision and planning efforts of coastal resource scientists and managers to protect and conserve seagrass communities of Texas. In addition to the report authors, several members of the Seagrass Monitoring Steering Committee deserve special recognition for their contributions to the final review of this report. Comments from Patricia Radloff, Ph.D. of TPWD, Tom Calnan of TGLO, and Philip Crocker, Ph.D. of EPA, Region 6 office, greatly improved the final product. Outside reviewers included Ricardo Lopez, Ph.D., Robert K. Hall, Ph.D. and Daniel Heggem of the USEPA-ORD, Landscape Ecology Branch, who provided key insights about landscape analysis issues. Ms. Margaret Scarborough-Flores kindly provided clerical assistance.

This planning project was supported by funding from both the Sport Fish Restoration Program (U.S. Fish and Wildlife Service) under Federal Aid Project F-37-TA and from the U.S. EPA, Gulf of Mexico Program under Assistance Agreement No. MX-97417301-0.
