

BAD NEWS TRAVELS FAST: THE SPREAD OF GIANT SALVINIA.

**Giant salvinia
can double in
size in less
than a week.**

**Even a tiny
fragment can
cause a new
infestation.**

If you spot giant salvinia, report it to

WWW.TEXASINVASIVES.ORG/REPORT

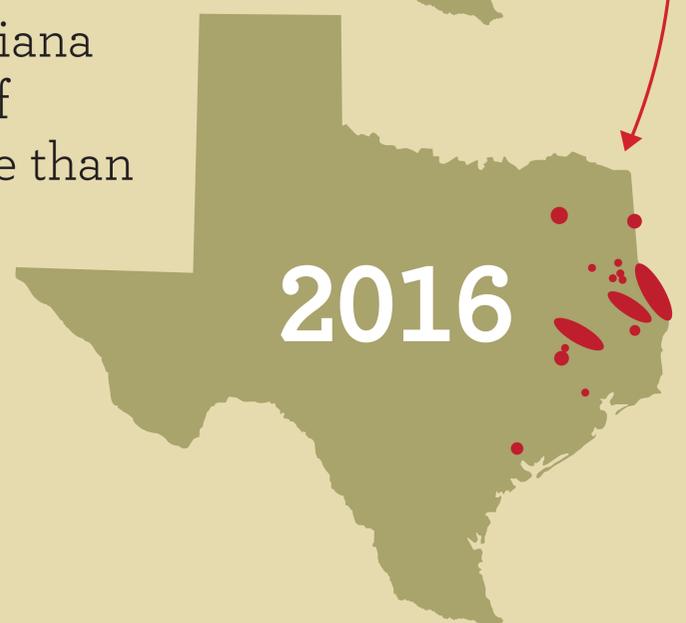

Earliest U.S.
outbreak is
detected. Texas
is not yet affected.

By 2006,
five lakes had
been infested.

Texas and Louisiana
bear the brunt of
infestation. More than
20 Texas water
bodies are
impacted.

**HELLO INVASIVE SPECIES.
GOODBYE TEXAS LAKES.**
