

TEXAS PARKS AND WILDLIFE

BIRDS

OF

PALMETTO
STATE PARK

A FIELD CHECKLIST

2009

Cover: Illustration of Red-shouldered Hawk by Chris Morel.

INTRODUCTION

Palmetto State Park is situated along the San Marcos River in Gonzales County, nestled in the Post Oak Savannah vegetation area of east-central Texas. The park is noted for its diverse flora and fauna, and is especially well known as one of central Texas' premier birding spots. The park and immediate environs contain some of the westernmost nesting distribution for many eastern species, such as the Pileated Woodpecker, Kentucky Warbler and Prothonotary Warbler. Also reaching their westernmost distribution here are Flying Squirrels, the Eastern Narrow-mouthed Toad, and numerous plants, mostly wetland species.

Several plant communities occur within the park, including bottomland hardwoods of hackberry, ash, elm and oak along the river, wet grasslands and a spartina marsh with occasional palmetto-filled swales, an oxbow lake, and several lagoons fed by an artesian well. Short hiking trails provide access to most habitat types within the park.

This checklist includes those species which have been sighted within the park or the immediate area of the park, such as along Park Road 11, the village of Ottine, the privately-owned Salt Lake, or on the grounds of the Texas Rehabilitation Center and Elks Hospital. Some species that are included were seen during the annual Palmetto State Park Christmas Bird Count, which extends from the park entrance in a 15-mile radius.

Throughout the years, many individuals have contributed information adding to our knowledge of the avifauna of this area. The compiler of this checklist edition is especially grateful to Rose Ann Rowlett, Ray Chancellor, Fred S. Webster, Jr., Ed Kutac, Jack Sunder, Charles Alexander, Willie Sekula, Greg Lasley, Pat Hartigan and Brush Freeman for the information they have provided. You can contribute to our knowledge of the birdlife of this area by reporting any unusual observations to the Natural Resource Program, Texas Parks and Wildlife

Department, 4200 Smith School Road, Austin, Texas 78744; or leave them at the park headquarters for forwarding.

Nomenclature and organization of this checklist follow the A.O.U. *Check-list of North American Birds*, 7th edition, as currently supplemented.

Please help us protect the natural avian communities in our parks by refraining from using playback tapes of bird songs. Frequent use of these tapes disrupts normal avian activity patterns, disrupts essential territorial behavior and may lead to nest failure. Thank you for your cooperation.

LEGEND

- A – Abundant: Present in such numbers and with such general distribution in proper habitat that many may be found in a given day.
- C – Common: Always present and in such numbers that one may expect to find several in a day.
- U – Uncommon: Normally present in habitat but one cannot be sure of finding one in a day. The bird referred to by the phrase “it should be there but we might miss it” is “uncommon.”
- R – Rare: Definitely not expected. On the average it occurs only a few times a season or not at all. It is always a surprise to see one.
- O – Occasional: Occasionally seen. Occurs only once or twice a year on the average.
- V – Vagrant: Occurs only once every ten years on the average.
- # – Known to occur in the areas near the park but not recorded within the park checklist area to our knowledge. These species should be watched for, as they undoubtedly pass through or over the park on occasion.

SP – March – May

S – June – August

F – September – November

W – December – February

CHECKLIST

	SP	S	F	W
___ Black-bellied Whistling-Duck.....		R	R	
___ Greater White-fronted Goose				#

CITATION

Rogers, Christopher D. October 2009. Birds of Palmetto State Park: a field checklist. Natural Resources Program, Texas Parks and Wildlife Department.

In 1983, the Texas Legislature created the Special Nongame and Endangered Species Conservation Fund. This fund may be used for nongame wildlife and endangered species research and conservation, habitat acquisition and development and dissemination of information pertaining to nongame management. Money for this fund is obtained through private donations and sale of nongame wildlife art prints and stamps. This fund now gives Texans a unique opportunity to help support this state's valuable and sensitive nongame resources. Your individual contributions and purchases of nongame art prints and stamps will help determine the level of nongame conservation activities in Texas. For more information call toll-free (1-800-792-1112) or contact: **Nongame and Endangered Species Program, Texas Parks and Wildlife Department, 4200 Smith School Road, Austin, Texas 78744.**
