# INTRODUCTION

**E**nchanted Rock State Natural Area, in Llano and Gillespie counties, is one of the gems of the Texas State Parks system. The park is located in the geological region known as the Llano Uplift or the Central Mineral Region of the Texas Hill Country. The area has vast exposures of ancient rock and is one of the most geologically interesting in Texas.

Biologically, the park is similar to the Edwards Plateau but there are also affinities with the northern plateau of Mexico and the Trans-Pecos region of Texas. The oak-hickory woodlands which develop on the soils derived from granite are distinctly allied with the Cross Timbers and woodlands of eastern Texas. Interestingly, many of the ferns found at Enchanted Rock are distributed across northern Mexico and Trans-Pecos Texas and are at their extreme eastern limit at Enchanted Rock. Conspicuous by their absence are Texas Oaks and Ashe Juniper which are otherwise common on nearby limestone soils.

In general, park habitats are varied and include oak-hickory woodlands and savannahs, seemingly bare rock surfaces colonized by lichens and mosses, vernal pools and meadows, and open mesquite-cedar elm woodlands. Along Sandy Creek, there is a gallery woodland of oak, elm, hickory and white buckeye.

Birdlife in the park is varied and interesting. Resident birds include Northern Cardinal, Eastern Bluebird, Carolina and Bewick's Wrens, Canyon Towhee, Golden-fronted and Ladder-backed Woodpeckers, Carolina Chickadee and Black-crested Titmouse.

In the spring and fall, several species of wood warblers rest and feed in the gallery woodlands around the day-use area. Rock Wrens can often be seen flitting about in the rocks near the trail to the summit of Enchanted Rock. On the lower area of Enchanted Rock, Black-throated Sparrows may be seen. This grassy area is also good for wintering sparrows such as Harris's, Lincoln's, Vesper, and White-crowned. Some resident sparrows which are easily observed are Rufous-crowned and Field.

In the summer, Bell's Vireos may be heard singing from the mesquite trees along the road to the camping area. In spring or fall, a hawk migration seen from the summit of Enchanted Rock is a thrilling experience. Also noteworthy are the flight patterns of vultures over Buzzard's Roost. Moss Lake is a good spot to see migrating and wintering ducks and possibly shorebirds, as well as the resident Belted Kingfishers.

This checklist is based on the work done by Kay and Ernest Mueller of Kerrville. This edition has been updated by Sherry Wilson. The organization and nomenclature of the birds listed here follow the American Ornithological Society *Check-list*

of *North American Birds*, 7th edition as currently supplemented. Because we will be updating this checklist as additional observations are made, we solicit your help and ask that you report new or unusual sightings or observations. Reports may be sent to the Natural Resources Program, Texas Parks and Wildlife Department, 4200 Smith School Road, Austin, Texas 78744 or may be left at the park headquarters for forwarding.

---

*Please help us protect the natural avian communities in our parks by refraining from using playback tapes of bird songs. Frequent use of these tapes disrupts essential territorial behavior and may lead to nest failure. Thank you for your cooperation.*

---

## LEGEND

### Seasons

- Sp = spring (March – May)
- S = summer (June – August)
- F = fall (September – November)
- W = winter (December – February)

### Abundance

- A = abundant — should be seen on 75% or more of trips in proper habitat and season
- C = common — should be seen on 50% or more of trips in proper habitat and season
- U = uncommon — should be seen on 25% or more of trips in proper habitat and season
- O = occasional — should be seen on 10% or more of trips in proper habitat and season
- R = rare — not seen annually but expected to occur again
- X = accidental — only one or two records in the past ten years
- I = irregular — absent some years, but may be numerous in others
- \* = breeding species — known to breed in park or breeding strongly suspected

## CITATION

Mueller, Kay and Ernest. January 2018. Birds of Enchanted Rock State Natural Area: A Field Checklist. Natural Resources Program, Texas Parks and Wildlife, Austin, Texas.

---

In 1983, the Texas Legislature created the Special Nongame and Endangered Species Conservation Fund. This fund may be used for nongame wildlife and endangered species research and conservation, habitat acquisition and development and dissemination of information pertaining to nongame management. Money for this fund is obtained through private donations and sale of nongame wildlife art prints and stamps. This fund now gives Texans a unique opportunity to help support this state's valuable and sensitive nongame resources. Your individual contributions and purchases of nongame art prints and stamps will help determine the level of nongame conservation activities in Texas. For more information call toll-free (1-800-792-1112) or contact: **Nongame and Endangered Species Program, Texas Parks and Wildlife Department, 4200 Smith School Road, Austin, Texas 78744.**
