

# TYPICAL FRESHWATER HABITATS

1. Draw a red circle around the predators (name them if you can).
2. Draw a green circle around the fish's prey (food).
3. Color items in the water that provide shelter for fish (anglers call that "structure").
4. Besides providing shelter, plants also provide \_\_\_\_\_ in the water for the fish to breathe.
5. Have fun coloring the rest of the picture!
